

# THE PATH TO PROFITABILITY

## CITY INVESTMENT SOLUTIONS

A proprietary trading company founded by a team of experienced traders with genuine interest and passion for the financial markets.

## Rising Talents Program

## **City Investment Solutions**

City Investment Solutions has worldwide reputation of creating and funding profitable traders. Our vision is to become the biggest in the industry and achieve the highest results possible. We are not just a trading company/school; our goal is to become an investment company trading our own money as well as our client's money all over the world. We are heavily involved in the forex and commodities markets.

By becoming part of our community you will become an integral part of the company and our success gaining both on a personal and professional level. We are the best on what we do because we like to invest in the right people and the right talents and give them everything to achieve their dreams along with ours.

We are looking for like-minded individuals to join our team and help them grow and develop by sharing with them all our strategies and tools that already made us profitable traders.

## **Rising Talents Program**

The Rising Talents Program is a unique one month program developed to create profitable and consistent traders of the financial markets. Our goal through this program is to develop elite traders to be able to join our Investment Company on full time basis and profitably trade our client's funds. No previous experienced is required, just the strong motivation and passion required to achieve such a notable task.

Throughout the program you will be taught all the essential elements of technical, fundamental and sentimental analysis along with live practice strategies. Also, we focus on the parts of risk management and psychology, which are the two most important element of your success as traders.

Trading the financial markets is not traditional wage based job it is a hundred percent performance based endeavor. Thus the program involves a small training fee that covers the study material and the one on one mentoring sessions with our Head of Trading who will be your personal mentor

## **Program Outline**

The program can be undertaken either on a full time or part time basis, as well as online or in office. During the first three weeks of the program your mentor will teach you the essentials of technical and fundamental analysis based on our strategies on Elliot Waves Theory. Going into the fourth week of the program you will be allocated a live trading account of 3000\$ and you will start using the strategies you have already been told in the live markets with the close supervision of your mentor in order to make your transition into the live markets as smooth as possible.

After the completion of the program you will keep trading the live trading account that you have already received either from our offices or from your home as a remote trader, the choice is yours. The profits will be split 70/30 in favor of the trader. Every two months we have an evaluation with all of our traders. The traders that have performed well in both months are allocated more funds in their trading accounts and are allowed higher risk management.

The traders that will achieve exceptional results of around 30-40% in a year will be qualified to work on full time basis in our Investment department handling our client's money. Those traders will be employed full time by our company and they will receive a fixed salary as well as their already existing commission from their trading profits. In order to qualify for our Investment department results are not the only requirement we look at, loyalty, respect and good character are also required.
