

THE PATH TO PROFITABILITY

CITY INVESTMENT SOLUTIONS

A proprietary trading company founded by a team of experienced traders with genuine interest and passion for the financial markets.

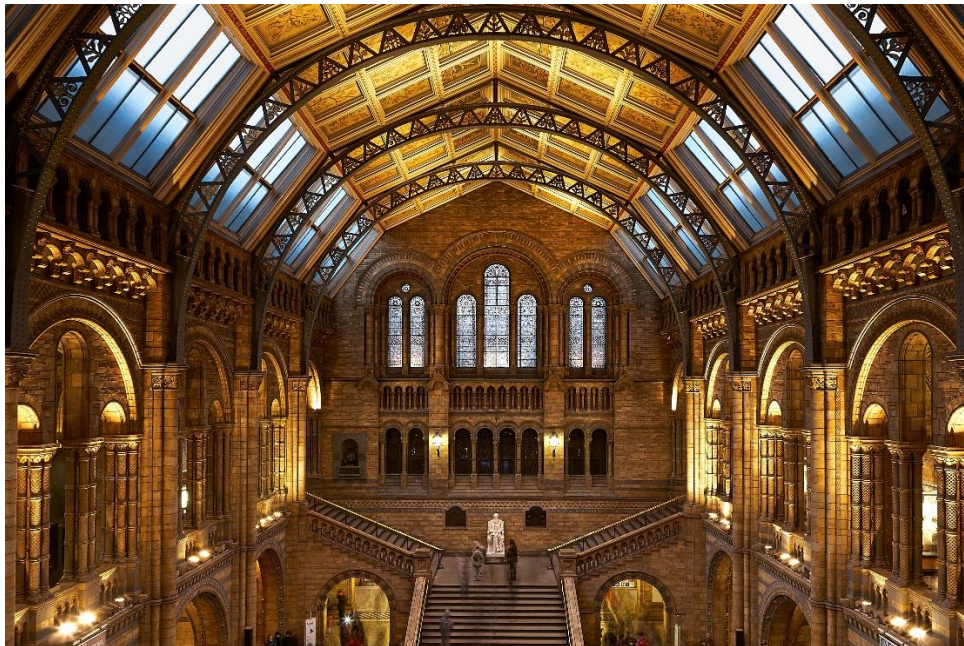

Top Trader Program

City Investment Solutions

City Investment Solutions has a worldwide reputation of creating and funding profitable traders. Our vision is to become the biggest in the industry and achieve the highest results possible. We are not just a trading company/school; our goal is to become a market leading Investment Company trading our own money as well as our client's money all over the world. We are heavily involved in the forex and commodities markets.

By becoming part of our community you will become an integral part of the company and our success, gaining both on a personal and professional level. We are the best on what we do because we like to invest in the right people and the right talents and provide them with everything in order to achieve their dreams along with ours.

We are looking for like-minded individuals to join our team to help them grow and develop by sharing with them all of our strategies and tools that already made us profitable traders.

Top Trader Program

The Top Trader Program is a unique program designed to give the opportunity to profitable and consistent traders to show us their skills and become part of our strong team. Our goal through this program is to find elite traders to be able to join our Investment Company on full time basis and profitably trade our client's funds. Previous experience of at least 6 months on a live trading account is required and the relevant Profit and Loss Statement must be submitted to our Trading Department for evaluation before acceptance of the trader into our team.

We do not charge any joining or administration fees like most companies do, we are here to actually invest in the right talents by allocating them our money if we believe they have the potential we are looking for. However, we expect our traders to stay in office at least for the first three months until they prove to us that they can trade profitably and with respect towards our money. After that initial period if the trader shows adequate results will be allowed to trade remotely from their home if they want to. Staying in the office involves covering your own desk fee.

Every trader qualified for the program will start trading with a live trading account of 5000\$. The profits will be split 70/30 in favor of the trader. Every two months we have an evaluation with all of our traders. The traders that have performed well in both months are allocated more funds in their trading accounts and are allowed higher risk management.

The traders that will achieve exceptional results of around 30-40% in a year will be qualified to work on full time basis in our Investment department handling our client's money. Those traders will be employed full time by our company and they will receive a fixed salary as well as their already existing commission from their trading profits. In order to qualify for our Investment department results are not the only requirement we look at, loyalty, respect and good character are also required.

Risk Parameters

- Overnight positions are allowed
- Maximum position size 0.2 lots at any given time
- No more than 2 trades open at the same time
- Maximum loss per trade is 0.75%
- All positions must be closed by Friday 8 pm GMT
- You are not allowed to have any open trades during big economic events like NFP, Interest Rate decisions, Central Bank announcements etc
- Maximum Stop loss on the account is 10%

All traders are expected to comply with all the risk parameters. Failure to do so will result in freezing of the trading account and withdrawing the funds, terminating our agreement.

SUCCESS
